# Die Bienenweiden im Frühjahr

- Zwiebeln/Knollen
- Stauden/Einjährige Pflanzen
- Sträucher niedriger als 1m
- Sträucher höher als 1m
- Wandbegrünung
- **Bäume**

Die Hauptblütezeit wird mit verschiedenen Farben und die Verschiebungen der Blütezeit grau gekennzeichnet. ( Die Blütezeiten verschieben sich durch den Einfluß der jährlichen Witterungsschwankungen)

Wertezahl von 4 bis1 (4 = sehr gut): Qualität der einzelnen Pflanzenarten als Nektar- oder Pollenlieferant

B= Blatthonigtracht
